# PROBLEM DEFINITION

---

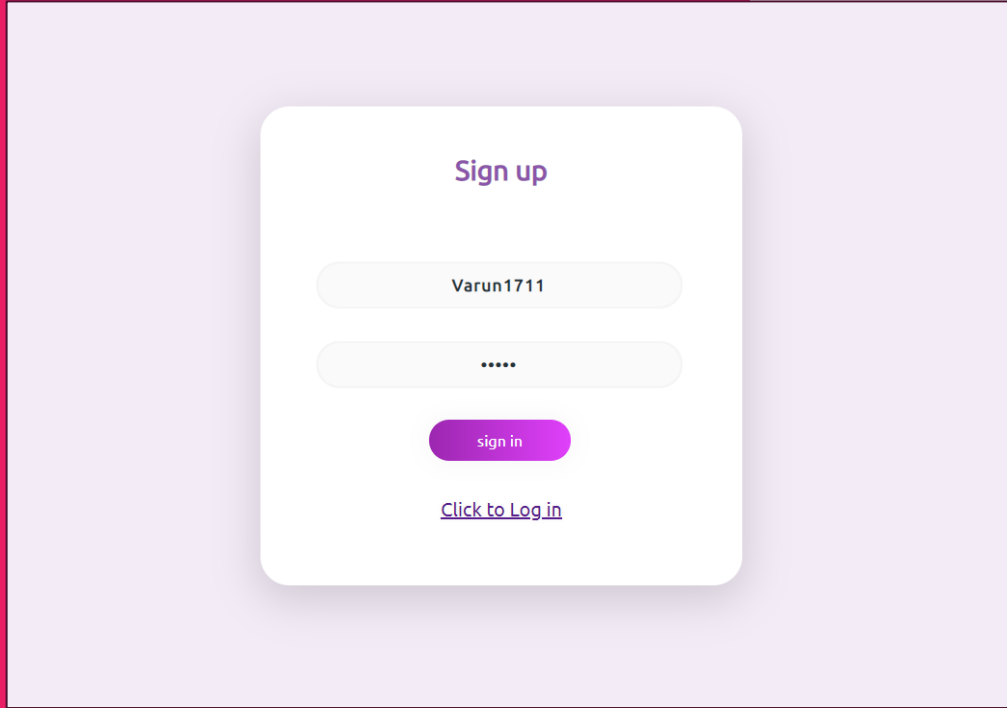

- The project is an integration of E-Commerce website and a recipe page.
- A lot of baking pages do not want to give up their recipes to their customers. But this website aims at nurturing the talents of the budding bakers who are interested to learn.
- This feature attracts a lot of users to the website and thus helps in improvement of the business.

# OBJECTIVE

- A highly user interactive design aimed at providing a very minimalistic approach to how we navigate a site.
- The main objective is to build a connection between the bakers and the consumers. The consumers can view the products the bakers have in store.
- The web page helps interested bakers to nurture their interest by providing them with baking tips and recipes. This attracts a considerable amount of customers.
- A website benefitting both the consumers as well as the bakers.
- Allow quick and easy navigation across the site.

# NEWSLETTER AND FEED

The screenshot shows a web browser with three tabs: 'Web Dev - Google Docs', 'AWARDSPACE.COM', and 'Crème Pâtisserie'. The address bar shows 'Not secure | creme.atwebpages.com/index.php'. The main content area features a contact form with the following fields and options:

- Name:** A text input field with the placeholder 'Your name'.
- Email:** A text input field with the placeholder 'Your Email'.
- How did you find us?:** A dropdown menu with 'Friends' selected.
- Newsletter?:** A checkbox labeled 'Yes, please' which is checked.
- Drop us a line on:** A text area with the placeholder 'Your message'.
- Send it!:** A yellow button to submit the form.

The footer contains navigation links: 'About Us', 'Blog', 'Press', 'iOS App', and 'Android App'. Social media icons for Twitter, Facebook, and Instagram are also present. The copyright notice at the bottom reads: 'Copyright © 2020 by Crème Pâtisserie. All rights reserved.'

MY CART PAGE

# CONCLUSION AND FUTURE ENHANCEMENTS

- It has a very simple and modern design to quickly navigate without any hassle.
  - The user can login and logout anytime.
  - It benefits both the user and the admin.
  - Effortless purchase and smooth business transactions can be seen.
  - Gives an opportunity to the interested bakers by providing recipe information.
- 
- We wish to extend the project to include a better user interface by using advanced technologies like angular, MongoDB, Nodejs.
  - We would also like to extend the project by allowing other bakers to sell under this title and hosting small competitions between the users.

**THANK YOU**
